FOUR PRINTING TECHNIQUES

Screen printing

Ideal for large quantities and bright colours.

- Intense, long-lasting colours
- Excellent wash resistance
- Best unit cost on large runs

Transfer

Perfect for complex, multicolour artwork.

- Faithful reproduction of artwork
- Suited to gradients and photos
- Small and medium runs

Embroidery

A premium, durable finish.

- Elegant raised finish
- Excellent durability over time
- Premium logos and lettering

Digital printing

Ideal for short runs and detailed artwork.

- High definition, realistic rendering
- No limit on colours
- Short runs and prototypes

PHOTOGRAPHED COLOURS

Textile tested for harmful substances, suitable for direct skin contact.

Ideal for

Companies · Events · Associations · Campaigns · Gifts · Merchandising

EVERYTHING ABOUT THE DANUBE

Which printing technique should I choose for the Danube?

Screen printing for large runs with solid colours, transfer or digital printing for photo artwork and short runs, embroidery for a premium, durable logo. Our team advises you according to your artwork and quantities.

Are the colours identical across a whole order?

Yes. The Danube is produced in a solid shade per colour, guaranteeing a uniform colour across the whole run, whatever the size.

Is the heather grey 100% cotton?

No. As with most heather t-shirts, colour 58 is 85% cotton and 15% viscose, which gives it its flecked look. All other colours are 100% cotton.

How do I choose the right size?

Refer to the size guide above: lay a t-shirt that fits you well flat, measure the width below the sleeves (A) and the shoulder-to-hem length (B), then compare. For a team, we recommend a typical split of S 15%, M 30%, L 30%, XL 15%, XXL 10%, adjusted to your audience.
